

PRINCESS CORALIA

First at that narrow passage called the Pillars of Hercules, there was an island. And this island was larger than Libya and Asia together, and it could go to other islands, and from these to the mainland opposite. [...] In later times [...], as successive earthquakes and cataclysms overtime, in the space of one day and a bad night [...] all in mass sank beneath the earth, and the island Atlantis similarly swallowed by the sea disappeared.

Platone.

When we started the project for this Master Piece in Jan. 2013, our idea was to create a special unique jewelry that could be the symbol of the Ocean, including all different wonderful creatures living hidden deeply in the seas.

The idea we had was to trying designing an Art pieces where all colors of the rich biodiversity of the sea would catch the eyes of everyone who look at the piece... bringing into a dream where all legend about mermaids, lost civilizations and magic colors let us feel the fragrances of the meerschäum brings us back to the era of the Mysterious Atlantis.

Two and half years later finally we get it!! And the emotions we felt once we have seen for the first time our Princess Coralia has been so great! All our staff of designers, goldsmiths really spent a part of their soul for this Unique jewelry that include more than 4000 gems that perfectly dance in between them.

Be enchanted by the unique spirit of the Paraiba tourmaline and the energy of the unique Australian Opal pendent... together with all other gems they will bring you back to the memory of the ancient times in which Mother's Nature watch over of every living species.

Princess Coralia.... A pure life Experience.
